6. POLICY DETAILS

6.1 Principles

Council will apply the following principles to all procurement activities:

Value for money

Council will seek to maximise value for money in all purchase decisions.

Factors such as quality, quantity, risk, timeliness and cost on a whole-of-contract and whole-of-asset-life basis will be considered to achieve the optimum combination which defines best value.

Open and fair competition

Prospective suppliers will be afforded an equal opportunity to tender or quote. Impartiality will be maintained in selecting suppliers.

Probity and transparency

Council's procurement activities will be performed with integrity and in a manner able to withstand the closest possible scrutiny.

Procedures will be implemented to ensure fairness and impartiality towards suppliers, consistency and transparency of process, identification and management of conflict of interest and security and confidentiality of commercial interests of existing and potential suppliers.

Accountability

Council will ensure responsibilities and requirements for compliance are communicated to all staff.

All procurement activities will be documented to provide an audit trail for monitoring and audit purposes.

Risk management

Council will manage all aspects of its procurement processes in accordance with its risk management policy to ensure all risks are identified, analysed, evaluated, treated, monitored and communicated to the standard required.

Council will ensure:

- systems are in place that limit the risk of unethical behaviour and clearly set the parameters of responsibility and authority
- more than one person is involved in, and responsible for each transaction
- appropriate authorisations are obtained and documented

Reporting

The procurement policy and implementation of related internal controls will be monitored and reviewed by Council's internal audit committee.

Environmental sustainability

Council will aim to make purchases that have the least impact on the environment and human health, within the context of purchasing on a value for money basis.

Preference will be given to purchasing products and services which:

- Minimise waste
- Minimise greenhouse emissions
- Minimise habitat destruction
- Minimise pollution
- Minimise soil degradation
- Maximise water and energy efficiency

Local sourcing

Consistent with the value for money and fit for purpose principles, where equivalent value can be sourced both locally and elsewhere, the goods or services should be procured from the local supplier.

Continuous improvement

Council will seek continual operational and process improvement including innovative and technological initiatives with the objective of reducing overall activity costs, improving management reporting capabilities and achieving best practice.

Collaboration

Council will seek and encourage the development of procurement collaboration with other councils and organisations including contracts available through the Victorian State Government, the Municipal Association of Victoria, Procurement Australia and other aggregated procurement providers as applicable.
