The Essential First Step.
MATCH TO EXISTING

**NOTES**

1. **Pavement Construction**
   - The proposed set-out plan is based on a typical layout of a highway access for a rural road. The design and details in the plan are only intended as a guide and do not form part of the final design. They are subject to change based on further investigations and approvals.

2. **Shoulder**: A designed shoulder area should extend a minimum of 6.0m from the edge of the traffic lane as shown on the matched area.

3. **Planing Permit**: A planing permit is required for any alteration to an existing drainage and may be required for the removal of sensitive vegetation.

4. **Traffic Management Plan**: A traffic management plan must comply with the RHA 2004 Code of Practice for High-Rise Safety Traffic Management in relation to any works undertaken within the road reserve.

5. **Drainage Access Construction**
   - The responsibility of the property owner is to maintain the drainage works.

**Diagram Notes**

- **Proposed Pavement Area**: Area: 444.027 m²
- **Shoulder**: Grade 1 in 3
- **Batter**: Width 2m

**Scale**

- Not to scale

**Not For Construction**
